

RESEARCH ORGANIZATIONS

Praescient's analysts combine technology tools with domain expertise to enable the research efforts of leading, national think tanks.

Enabling High Profile Security Research

Praescient partners with organizations inside the Beltway and beyond to deliver enhanced research capabilities through the use of advanced analysis platforms.

The Critical Threats Project (CTP), an initiative of the American Enterprise Institute (AEI), conducts open-source analysis of key national security challenges, shaping strategic policy debates about many emerging threats. Praescient provides analytical software training and data management to CTP analysts as they study terrorist networks and political dynamics in Yemen, Somalia, North Africa, Pakistan, and elsewhere. Praescient's contributions have been featured in several high-profile reports.

The Institute for the Study of War (ISW) works to improve how leaders understand conflict and military issues by providing open-source independent analysis, accurate data, and superior insight on current conflicts. Praescient supports ISW analysts by developing custom workflows for a range of research efforts, including investigating the structure and composition of the Free Syrian Army and exploring the changing security and political dynamics in Iraq and Afghanistan.

Center for a New American Security (CNAS) is a nonprofit and nonpartisan organization focused on studying military and defense topics and advancing strong national security policy. Praescient established a partnership with CNAS to help with a new line of research into veterans' health issues. Topics of study included demographic composition, physical health, mental health, suicide, homelessness, employment, education, environmental exposure, and the efficiency of organizations such as the Veterans Administration. Praescient's analysts provided platform integration and training to help CNAS researchers integrate disparate datasets and conduct geospatial and temporal analysis on these issues.

IMPACT: BROUGHT TECHNICAL EXPERTISE TO RESEARCH INSTITUTIONS, ENHANCING THEIR ABILITY TO PROVIDE LEADERS WITH ACTIONABLE INSIGHT

Research Organizations

Praescient partners with leading research organizations to integrate advanced technologies and analytic methodologies to expand the impact of their work in the national security community and beyond. Analysts and engineers work together to help non-profits and think tanks collect, organize, and evaluate new and emerging forms of open-source information to generate new and innovative insights.

About Praescient

Praescient Analytics delivers embedded analytical services, data integration, platform customization, and training in partnership with leading technology providers. Our teams of analysts and engineers provide solutions to federal and commercial clients engaged in critical defense, law enforcement, intelligence, cyber security, financial, investigative, and legal analytics missions.
