Praescient's Team embeds with units across the world to provide technical support and enhance the analytical capabilities of our military branches.

Combating Green On Blue Attacks in Afghanistan

U.S. and allied armed forces were tasked with training local military and police units to take over regional security in preparation for the drawdown of troops in Afghanistan. The NATO-led military coalition endeavored to prepare the Afghan soldiers and officers for the task ahead, but a troubling rash of "green-on-blue" attacks emerged as a major source of casualties. Originating mostly in the insurgent rich Helmand and Kandahar provinces, these insider attacks were carried out by elements of the Taliban who infiltrated legitimate Afghan units. Dozens of coalition casualties were attributed to this epidemic.

Praescient supported an elite division of the U.S. military, embedded at a frontline forward operating base, enabling actionable intelligence from massive, disjointed datasets which included enemy movements, suspected operating areas, and attack events. With a better grasp on this crucial information, leaders on the ground could predict when insider attacks would happen and could better investigate the root causes behind them thanks to the work of Praescient's team.

Praescient was able to achieve this success due in large part to their ability, augmented by headquarters-based engineers, to modify the unit's analytic platform and intelligence methodologies to conform to the rapidly evolving threat picture. Praescient believes this combination of domain expertise and technical agility is more-than-ever required of analysts and operators to have a meaningful impact in lethal and non-lethal operations today.

Since the company's inception in 2011, Praescient has deployed with several military units globally. These embedded analysts are fully integrated into the daily battle rhythm of a variety of military elements, providing technical and analytical support to enhance their missions abroad.

IMPACT: IMPROVED THE SAFETY AND ENHANCED THE EFFECTIVENESS OF A U.S. MILITARY UNIT THROUGH SUSTAINED, EMBEDDED SUPPORT

635 Slaters Lane, Suite 200 Alexandria, Virginia 22314

Defense

The analysts and engineers of Praescient's Defense Team lean on years of experience across the armed services and in the national security community to deliver impactful results to our clients. The team embeds in direct support of units operating in active warzones and with special operations forces around the world. The efforts of Praescient personnel have directly enhanced the security and capabilities of several defense organizations serving on the frontline.

About Praescient

Praescient Analytics delivers embedded analytical services, data integration, platform customization, and training in partnership with leading technology providers. Our teams of analysts and engineers provide solutions to federal and commercial clients engaged in critical defense, law enforcement, intelligence, cyber security, financial, investigative, and legal analytics missions.
